

Local and Organic Since 1982

Providing education about the safe application of fertilizers and the reduction of pesticides to enhance water quality and environmental health

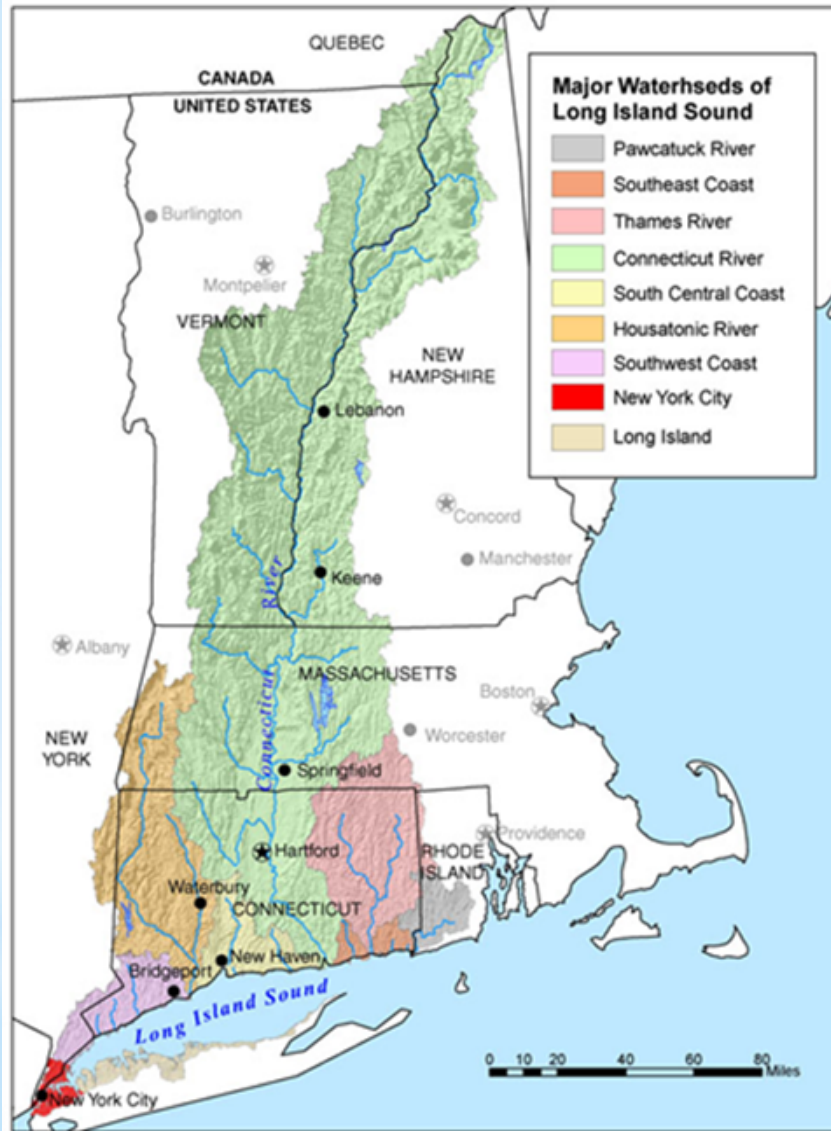

The logo for Organic Land Care NOFA is an oval shape. The top part is green with the text "ORGANIC LAND CARE" in white. The bottom part is green with the text "NATURALLY BEAUTIFUL" in white. In the center, the word "NOFA" is written in large, yellow, bold letters, with a globe icon inside the "O". Below "NOFA" is the website "organiclandcare.net" in yellow.

## Organic Yards and Lawns

Two photographs showing organic yards and lawns. The top photo shows a garden with purple flowers and a tree. The bottom photo shows a lawn with a table and chairs.

Photo Credit: R. Darke

*Information and resources you need to cultivate a healthy, sustainable yard using natural processes and leaving out harmful chemicals.*

## Long Island Sound Watershed Regional Conservation Partnership Program

**\$10 M awarded to CT Council on Soil and  
Water Conservation by USDA NRCS**

### Landscape Scale Initiative on Working Lands – Six States/Five Years

1. Soil Health/Nutrient Management focus on technical assistance to producers resulting in adoption of BMPs
2. Forest Land Protection (HFRP) – limiting conversion of forest land to urban land uses
3. Restoration/resiliency of riparian floodplain areas in Deerfield River and adjacent basins

# Cultivation of Seaweeds in Northeast America for Nutrient Bioextraction

## **What's Next in Coastal Management? Bioextraction technologies that move towards a balanced ecosystem approach**

In nutrient rich coastal waters (LIS) we can use extractive organic aquaculture of shellfish and extractive inorganic aquaculture of seaweed to provide invaluable ecosystem services and produce unique suite of commodities!

# Nutrient Bioextraction
